PUTTING IT ALL TOGETHER

- Among the various technologies that we have been exposed, I like to use my own website created in wordpress in which I can add all the subject material like PPTs, Notes, pdf of question bank, youtube video links for better understanding of my students. And students can use this material anytime and anywhere.

Challenges those we can expect while integrating this technology into our classroom are:

- Access to website needs internet connection, laptop / Desktop; this may not be possible in all lectures.
- Internet connectivity and speed are also the major challenges.
